Luxembourg company, vyzVoice, wins StartUp Europe Award

Luxembourg start-up, vyzVoice, has been named overall winner of the ICT category of the StartUp Europe Awards. vyzVoice CEO, Robert Spicer accepted the award at the ceremony presided by the President of the European Parliament, Mr. Antonio Tajani.

Promoted by the European Commission, the StartUp Europe Awards aim to create an ecosystem based on the most outstanding startups from across the continent. In addition to demonstration of innovation and a viable business model, winners are selected based on their contribution to advancing sustainability, active social responsibility engagement and participation in European projects and partnerships.
The initiative is supported by the President of the Committee of the Regions and several members of the European Parliament. It is organised by StartUp Europe Accelerator by Finnova.

vyzVoice, based in Windhof, was founded in 2014 and currently employees a multinational team of 27.
The company provides solutions for middle market companies that remove technical barriers to digital transformation. These secure, rapidly deployed, cost-effective solutions allow companies to use data driven decisions to transform their business models and remain competitive. Technical applications include industrial asset management, energy and resources management & planning, sustainability optimization & reporting, and building facilities management integration.

Previously named winner of the Luxembourg ICT category, vyzVoice was selected as European winner from national finalists across Europe.

"We are honoured to receive this award that recognizes vyzVoice as an innovator on an international level and Luxembourg as a strong base in European eco-system for start-ups", says Robert Spicer, vyzVoice CEO. " This award will provide great support to us in our continued development and growth".

About vyzVoice

vyzVoice, based in Luxembourg, delivers solutions that remove barriers to digital transformation and simplify the process for middle market companies to gain data-driven insights, across their organisation, to produce results.

Based on Chorus, a secure, cloud-based application framework, vyzVoice delivers solutions for Data Center Infrastructure Management, Industrial Asset Management, Sustainability Optimization & Reporting, and Comfort & Wellbeing.
