CREATIVITY IS IN OUR DNA

Creativity has always been central to Luxembourg's economic development. Despite its small size, the country managed to establish itself as one of the world's largest cast iron producers and, later, as a world-leading financial centre by harnessing a strong capacity for creative thinking.

Creative industries generate economic value, foster employment opportunities and offer innovative ideas for other economic sectors. The Luxembourg government is fully aware of the importance of having a strong creative sector and has shown a strong commitment to supporting its development.

Located in the heart of Europe with a globally connected economy, Luxembourg provides excellent access to the European and worldwide markets and is an attractive destination for creative companies looking for a wider geographic reach.

The paths to reach decision makers and receive support are short and provide creative entrepreneurs with high-potential ideas with a quick access to the local market. International talents that choose Luxembourg as a home base find it easy to assimilate into this cosmopolitan and multilingual country. Luxembourg is also a haven for creatives that have the vision needed to transform disaffected industrial sites into modern living and work spaces.

Managed by Luxinnovation, the Luxembourg Creative Industries Cluster aims to support the economic development of the sector. Our main priority is to foster an innovation and business-friendly climate for the local creative industry ecosystem.

We map and analyse the creative industry players in order to raise the awareness of the existing ecosystem and promote synergies with other sectors. We identify and develop tools aimed at helping the creative industries become more resilient and economically viable. We also guide and support creatives in their transition towards a more digital and sustainable way of doing business.

Luxinnovation, the national innovation agency, empowers companies to innovate today to be ready for tomorrow. It also contributes to the development of the economy as a whole by identifying innovation opportunities and fostering collaborative innovation projects that stimulate the development of a sustainable, competitive and digital economy.

Set up in 1984 as an Economic Interest Group, Luxinnovation is supported by the Ministry of the Economy, the Ministry for Higher Education and Research, the Luxembourg Chamber of Commerce, the Luxembourg Chamber of Skilled Crafts and FEDIL - The Voice of Luxembourg's Industry.
